Service now, JIRA, Slack Elastic, Grafana Dashboards and GCP

Education

BE, Appa Institute of Engineering and Technology, Kalaburagi

Aug 2016 - Jun 2020

B.E. in Electronics and Communication Engineering

PU, Doddappa Appa Pu Science College, Kalaburagi

Aug 2014 - Jun 2016

Project Work

- **Excel sheet Automation [Capgemini Internal Project]:** The project involves automating the management of employee data through a web interface linked to Excel sheets. Key functionalities include:
 - We have successfully completed this automation project using Spring Boot and ReactJS framework
 - With this application, we can add and update EMP data in the web, without using MS Excel
 - The data will be stored in MySQL DB for recovery, and we can download the updated Excel sheet from DB
- **Smart Contact Manager Project:** This Project built with Spring Boot and ReactJS.
 - It allows users to sign up and log in and verify for the account validation. Users can manage their contacts by adding, updating, deleting, and searching for them.
 - Contact pictures are uploaded to cloud services like AWS and Cloudinary.
 - The application supports viewing contact details, sending emails, and exporting contact data to Excel. and a user-friendly interface with dark and light theme options.
- **Cube Runner Game:**
 - It's Only single level PC game, Developed with the help of Unity Game Engine and C# programming language

Awards and Certificates

- AWS Certified Cloud Practitioner CLF-001 Certification
- Programming for Everybody (Python)
- Front-End JavaScript Framework: Angular
- Spring Boot with Embedded Database
- AWS Cloud Technical Essentials
- Agile Software Development
